Executive Summary

Thin Content Problem: 14 blog posts (35% of all posts) are under 200 words — essentially placeholders that signal low quality to Google and may trigger sitewide ranking penalties.

Content Gap: Only 6 posts (15%) exceed 1,450 words. The strongest post is "Interior vs Exterior Shutters" at 3,446 words — a genuine pillar page.

Local SEO Gap: Google Business Profile is **not set up** — this is the #1 factor for local pack rankings. Zero of 61 citation opportunities have been claimed.

Google Search Console: Unknown status — may be managed by the website management company, but needs verification.

Priority 1 — Delete Thin Content Immediately

These 14 posts are 67–200 words of generic, duplicated text with no ranking value. They hurt SEO by diluting site quality.

ID	Post Title	Words	Date	Action
1997	Aluminium Security Shutters: Excellent Choice	67	2022-11	DELETE
1993	Aluminium Security Shutters: Durability/Strength	74	2022-11	DELETE

📄 Google Search Console Status

Status: UNKNOWN

Cannot verify if the management company already manages GSC without a Google account login.

How to Check

1. Go to **search.google.com/search-console**
2. Sign in with a Google account (e.g., craigp@ctdesignz.co.za)
3. Click "Add property" → enter `houseofsupreme.co.za`
4. If already claimed → message says "verified by another user"
5. If NOT claimed → verify immediately via DNS TXT record

If not claimed: Verify immediately → submit sitemap → set up email alerts for indexing issues.

What to Do Once Inside

- **Submit sitemap** — essential for indexing all pages
- **Coverage report** — see which pages are indexed vs excluded
- **Performance tab** — what queries bring traffic, which pages rank
- **Core Web Vitals** — page speed issues affecting rankings
- **Mobile Usability** — any mobile rendering problems

Even if the management company has access, YOU should too. GSC data is essential for SEO decisions — without it, you're flying blind.

Local Citations — 61 Opportunities

NAP (Name, Address, Phone) consistency is critical. Every listing must match exactly:
